

# ANGRY PANDA

**ROAR**

**XPAND**

**UBEAR**

**EBEAR**

The Angry Panda project aims to protect investors from the inherent risks in investing in cryptocurrencies, guaranteeing almost the whole value paid for its tokens. In addition to giving greater security and confidence to investors, it is designed to facilitate and encourage the daily use of cryptocurrencies providing fast, cheap and secure ways to send payments.

Supporting the price of its tokens, the Angry Panda project allows to safely trade and make profits, send payments and, above all, to be more protected against significant losses in value during the bear markets.
